| Unknown |
|--|
| |
| |
| Roots and debris from line cleaning earlier in the day caused blockage at manhole downstream. |
| CCTV found extensive debris. All debris removed and no structural problems found. Upstream mainline is plugged - car |
| operator is not sure what caused the stoppage - potentially rags Root intrusion from a lateral into the main. |
| Unknown Cause Plug Main due to heavy FOG roots/fog |

Terminal Manhole #392-45 in sidewalk overflowed into catchbasin. Contained in storm drain and cleaned.

seeped out of ground above pipe in backyard

MH# 242-03

MH# 532-09X

Proper Y cleanout on front yard sewer lateral

MH # 363-09

2 manholes ~55' apart in the intersection of 31st & Delmonte (490-24 & 490-23) both overflowing.

out of c/o at 3515 Michael

6 adjacent manholes overflowing from same mainline

MH# 266-23

Lateral Cleanout

MH# 407-01

MH#363-04

MH# 363-04X

Private lateral cleanout

Water seeping from MH#413-29 on sidewalk

MH# 552-13 in ROW

private lateral clean out

MH# 407-01 overflowed - ran along curb/gutter, crossed to north side of street and ended up in open land/unpaved surfac

MH# 532-13X

Overflowing M/H # 307-03. Terminal MH.

MH# 407-01 near entrance to PGCC

MH# 181-01

Proper cleanout on private lateral - main plugged

MH# 533:33

MH# 553:33

MH's 428:31 & 428:30

MH# 137:12

Clean out on private lateral

MH# 475:28

Pressure Relief Valve on Forcemain

Private Manhole - Main determined to be private.

MH# 553:12 This manhole has a smartcover alarm. Alarm notified crews of high water in MH.

MH# 575-10

MH# 493:13

MH # 554-33.

| Small portion (<10gal) reached bubble-up storm drain. All recovered and storm drain cleaned. |
|---|
| |
| Large open space on hill. Bottom of hill has concrete v-ditch that runs to a storm drain that runs to 19th Ave Channel Storm drain with pipe - runs to Laurel Creek Storm drain flows directly to East Laural Creek |
| San Mateo Creek |
| Storm drain plugged downstream. All recovered and returned to sanitary system. |
| Private property - yard and driveway |
| Spill pooled in creek water which was not flowing because trashrack was blocked with leaves and debris. All spill was vac Spill flowed down curb into a catchbasin where it was contained. CB cleaned. |
| Trickle of spill entered storm drain. Crews plugged drain and captured and cleaned all of spill. |
| Storm Drain flowed to 16th Ave channel |
| Spill flowed from MH down gutter and entered a storm drain catchbasin that flows directly to creekbed - creek mostly dry Spill entered storm drain pipe with outlet on side of hill. Spill soaked into ground a few feet from outlet - never made it to |
| Spill entered E Laurel Creek Spill entered E Laurel creek |
| spill flowed into a storm drain and then into 19th ave Channel manhole spilled over and flowed to catch basin |
| |
| |
| Spill flowed down hillside and soaked into ground. Bubble up storm drain |

| CCTV found offset joint in main. Possible that root-foam 6 weeks prior may have broken down roots that built up at offse |
|---|
| Root blockage caused spill out of manhole - 900 gal. As crews were removing blockage, pipe broke and additional 300 ga |
| Roots found in downstream mainline, however, this location is a repeat offender of spills during storm events |
| Mainline plugged |
| PVC Repair at manhole has created a lip that catches material (paper). Smartcover on this manhole sent alarm at 10:49 |
| UNK |
| Jet punched thru blockage quickly and flow raced downstream (steep pipe). Later discovered an old jet nozzle inside pipe mechanical cleaning tool/debris found in pipe causing blockage and backups |
| |
| roots in the main line |
| Force main pressure relief valve leak |

Plan rehabilitation or replacement of sewer

Plan rehabilitation or replacement of sewer

Added sewer to preventive maintenance program

Plan rehabilitation or replacement of sewer

| tv line to locate blockage and recommend follow-up root control Refer to engineering Refer to engineering This area under evaluation as part of overall city SSMP capacity assurance program. |
|---|
| Area included in root control program. Requested investigation from consultant assisting with flow modeling/sewer capac |
| |
| |
| Handrod and PowerRod roots to clear blockage. Pumped spill back into manhole. |
| Will follow-up with CCTV |
| Removed old jet nozzle from pipe. Will monitor line - but with nozzle removed, anticipate fewer problems. |
| CCTV to evaluate pipe integrity. |

19th Ave Channel and Marina Lagoon

Spill entered 54 diameter storm drain that does not discharge to waters for a mile down the pipe. Catchbasin and some a 16th Ave Channel

SD plugged downstream. All recoverred.

Marina Lagoon

Catchbasin flows directly to Channel to Marina Lagoon
Entered catchbasin that flows to 19th Ave Channel which flows to the Marina Lagoon
Laurel Creek which flows into East Laurel Channel which outfalls at the South end of the Marina Lagoon
Laurel Creek which outfalls at the southern end of the Marina Lagoon
19th Ave Channel - flows to Marina Lagoon
Edgewood Creek
lawn
Bubble-Up storm drain

Street & Bubble-Up

Reached a storm drain that was plugged downstream to capture all of spill.

Marina Lagoon

Storm Drain Plugged Downstream. All contained.

Storm Drain plugged to capture spill, then vacuumed and cleaned.

Storm Drain plugged - spill contained

Storm drain plugged. All recovered Storm drain plugged - all captured in the dirt on the side of a hill Brick retaining wall.

Sewage ran down gutter to bubble up storm drain were it was contained and recovered Bottom of catchbasin had a 4 lip to where the pipe started - sewage never made it downstream of the catchbasin.

Bubble-up Storm Drain

Drain grate on bridge outfalls to Marina Lagoon. Storm pumps directly underneath bridge pumps lagoon water to SF Bay East Laurel Creek - running through Sugarloaf open space.

Storm drain plugged. All contained and cleaned.

Patio area in back yard

| contain, relieve blockage, cleanup Unable to restore flow due to heavy rain event. Capacity issue forwarded to Engineering for evaluation. |
|---|
| Removed brick. |
| Engineering review to alleviate storm related SSOs at this location - grade issue. |
| flow was restored after rain let up |
| Heavy Storm - I&I Rreferred to engineering division for review |
| CCTV to verify if SSO caused by I&I or if other structural problems exist. Referred to engineering |
| These pipes recently CCTV'd by contractor. Will be reviewing tapes to determine required rehabilitation needs or alteration |
| Provided resident with claim package. Mailed FOG education flyers to residents along mainline. |
| Emergency repair of sewer main completed 9-9-2011. 10' of main replaced. |
| Storm drain plugged. All contained. |
| Removed blockage, cleaned and disinfected area. CCTV and forward video to engineering for pipe evaluation. CCTV confirmed severe FOG. Letter and FOG education pamphlets mailed to surrounding parcels. |
| Contractor contacted. |
| Mailed FOG educational pamphletts to residences along main No witnesses to event. Contractor for Bay Meadows development contacted City on 4-17-12 requesting clean-up of debr |

| Location with engineering for solution to surcharging Will CCTV after storm to identify if possible blockage occurred - or determine need to improve capacity |
|---|
| Plan to CCTV pipe |
| Flyer residents along mainline with FOG prevention handouts |
| Line needs re-engineering to correct flow issues. Will CCTV pipe and plan accordingly. May increase preventative maintenance if no structural defects found. Part of engineering's Citywide I&I/Wet Wweather Capital Improvement Program Capacity improvements are part of engineering's wet weather capital improvements program. forwarded to engineering for review/design re-engineering Referred to engineering for review Referred to engineering |
| |
| |
| |
| Emergency Repair of Manhole |
| Capacity solutions under engineering design |
| |
| Root-foam application |
| Contractor notified. Contractor installed lock mechanisms on air relief valves along temporary bypass line and marked pi adjust maintenance schedule and/or repair pipe pending cctv results |
| Parallel trunkline planned to provide capacity. Project start: December 2013. |

Manhole

Pipe connection split apart where cast iron connected to the poly line. Rod hole Rod hole #271

Lamp hole

Rod hole # R241 Sewage backed up sewer main and exited out of the lateral under the house Manhole number MH1283

Manhole number MH1071 Manhole number MH765 MH739 Clean out

Rod hole number R434
MH736
Break in the pipe 30' downstream of MH1592
Sewer line between MH1850 and R471
Spill exited a trench plate.
Private cleanout for 30 Twin Oaks
MH686
MH1227

water exited a private lateral near our easement that runs between Marina Ct. and Point San Pedro. The overflow ocurred at a private manhole at 24 Summit. The low point on that system. Sewage was leaking from a burried rod hole that was missing it's cap. Spill exited a clean out in the yard of 101 Picnic clean out for 71 Twin Oaks Ave

Rodhole R78

private clean out to 219 Center
clean out in the yard of 57 West Crescent
Clean out in sidewalk
Burried Rod Hole(R310) in the street. Water was weeping through the asphalt road.
Spill exited a contra costa valve to 7 San Marino Drive.
offset joint on a gravity sewer pipe
Rod hole
Clean out for 11 Chestnut

private clean out to 511 Mission private clean out

bubbled up through the ground from a rusted through corregated metal pipe

private cleanout

Rod Hole

Private residential cleanout

Rod Hole R318

rod hole

Air Release Valve

Rod hole

Rod hole

private clean out

Contra costa valve at 220 Clorinda and shower drain at 212 Clorinda

Water exited out of the private clean out for 46 Mooring

The sso leaked out of a crack in a private lateral that runs along side a creek.

Rodhole

Rodhole number r815

The water came up through the roadway

Private cleanout for 209 3rd St

Rod Hole

The spill exited a private cleanout in front of the residence private cleanout on sidewalk

Private Clean Out

A small force main break caused sewage to exit through a nearby water valve in the street.

The water district notified us about a possible break in our line from water appearing through cracks in the street at differe

private clean out in planter strip

After leaving the manhole the SSO flowed over land down a hillside and became visible along the roadway near 17 Albio Burried manhole

| After leaving the manhole the water flowed down the street and into an unpaved surface in the county right of way. |
|---|
| They found about 1 gallon of water ponding in the bottom of a nearby storm drain. |
| By the time I arrived at 11 pm the overflow had ceased. I then went to the furthest downstream storm drain inlet to sand: Contained in storm drain and removed with vacuum truck Spill was contained in the storm drain systems of the industrial complex. The storm drain system drains into a wet well / p Industrial complex storm drain system that ends in a wet well & pump station. Pumps were turned off and the spill was co |
| Storm drain was blocked off with a inflatable plug down stream at a dry location. Then storm drain was vactored clean & : |
| Spill ended up in a Non-Landscape area between house and fence |
| Landscaped Back Yard |
| Clear sewage was absorbed into the ground Owners Yard, where it was shoveled up into Bags and disposed of in Debris box |
| Earth dam placed down stream in the gutter and liquid was vactored up |
| Spill drained off the road to a ditch alojng side the road. Spill was then vactored up out of the ditch along with the mudat t |
| spill contained, and returned to sanitary sewer system. |

contained in excavation that was dug in order to conduct repairs

Spill most likely got to a drainage channel that eventually leads to surface waters(creek).

All spill captured in curb and gutter.

Spill contained before reaching storm system Calabazas Creek

Creek bed at low tide. Water pooled in bed alonside bridge.

Small amount fully contained in catch basin.

Flower garden area of side yard.

Storm drain 50 ft from manhole drains to culvert that empties into Richardson Bay in an underwater culvert. Heavy rains Flowed to storm drain on Marinship Way that drains to Richardson Bay

All storm water in Marin City flows into the Storm Water Surge Basin located at lower Marin City, East of the shopping ce

Stormwater dilluted SSO reached Richardson Bay near the foot of Libertyship Way. Some sewage recovered and pumpe

Sewer spill flowed out of the manhole and naturally disipated in the hillside soil.

Sewage seeped into the ground near the SSO manhole location

Richardson Bay

It is estimated that very little (less than 10 gallons of sewage) of the combined water/sewage was contained in a downstre Surface sewage flowed into a nearby storm drain inlet. The downstream storm drain line was plugged to contain the spill.

vactor truck

The spill was contained by existing sheet piles and flowed to the underdrain for the odor biofilter. This drainage system flowed to the underdrain for the odor biofilter. This drainage system Leakage from the Force Main was contained by existing cofferdam in excavated construction area and was returned to the Leakage from the Force Main was contained by existing cofferdam in excavated construction area and was returned to the Leakage from the Force Main was contained by existing cofferdam in excavated construction area and was returned to the

The water left the pump station and ran into a lawn shrubbery area then under a fence and onto a portion of the taxiway for the final destination was along the levee road and then into the tidal wet lands area.

There was no liquid evidence of a spill. Only the dried remants of a past spill located on the grass and plants. In addition 1 During the on going joint repair as reported for February there was some seepage from the temporary repair and then sor the water sprayed from the air releif onto the levee road. It stayed there and evaporated.

This portion of Inner Bair Island collects rain water during the wet weather season. The spill ran into this standing surface Upon the initial finding of the leak, lift pumps were placed in-service to create a negative pressure on the forcemain. Once

250 gal. spilled recovered 250 gal. plus approx. 750 gal. of clean up water Flushed gutter/catch basin/and storm line, all spill & flushing water recovered and returned to sewer

The SSO had stopped before arriveing on the site. We cleared the main, then washed down and cleaned up site

Main is on regular P M for hydro flushing. Work order was in the que for maint. It will be hydro flushed within the next 2 w

Contractor called and responded. Excavated by hand(shallow line) to leak; performed temporary repair. Permanent repair

Responded to power outage at surcharge pump station. Found power out and pumps not running. Sewer manhole was ov Barracaded roadway to prevent entry to area.from both directions of Marinship Way. Signs posted warning of sewage sp Staff responded to report oif SSO and arrived on site in approximately ten minutes. Reported findings and need for sewer

Turned off force main. Placed repair clamp and checked for no leaks. Sewer contractor vacuumed, hosed and vacuumed

District contractor with staff assistance cleared the bolckage from the line cause by the line seperation. District staff inspe A private party notified the District of the SSO. The responding District operator found the manhole overflowing from the City Crews assist the District with recovering about 500 gallons. The District immediately restored normal sewer operatior The Contractor called the local water department to shut off the broken water line. District staff responded and contained

when the spill was reported SBSA operations was able to place lift pumps in service thereby stopping the leak prior to the

Contractor entered pipe, inpsected and videoed affected area and applied oakum as a temporary fix. During inspection m This report is a continuation of the SSO report filed for December 2008. Video inspection, design of shoring and temporal This report is a continuation of the SSO Report filed for December 2008 and January 2009. Contractor was on site and m This report is a continuation of the SSO Report filed for December 2008, January 2009, and February 2009. Contractor w

A crew was sent to the pump station to squeege any remaining water off the taxiway, and from the pump station driveway Mitagation will continue. There is no public access to this area. The area has been cordoned off and equipment is being n After excavation of the joint any sewage that leaked during the repair process was fully contained and pumped back into t As explained earlier there was no active spill at the sight. Rather only dried remant's of a past spill in this location. The ev After excavation of the joint any sewage that leaked during the repair process was fully contained and pumped back into t The water spayed out from the air relief. The valve to the air relief was then closed and the discharge stopped. The water spayed out from the air relief. The valve to the air relief was then closed and the discharge stopped.

After excavation of the joint any sewage that leaked during the repair process was fully contained and pumped back into the

The initial response was to stop the flow by placing a negative pressure on the forcemain. Vacumn trucks were used to re

Truck operator for the contractor cleaning the wetwell opened the wrong valve on the vacumn truck.

The point of release is located along a pipe joint. The pipe will need to be fully excavated to determine the cause. This wo

The spill point occured at a faulty automatic airrelief.

automatic force main air relief valve obstructed with grease and other debris. The operator inspected the site on June 19t 090613 Still unknown. The excavation will not begin until Monday the 9th. 091213 The cause is unknown. The appearant The automatic air releif valve had grease in the valve. The last time the ARV was checked was on the 15th when it was c Due to sever storm Flooding occurred and flooding about the Lift station. Ending time is est. of area returning to normal. It Sever storm and flooding severe storm and flooding

Due to heavy rains and some flooding

Shirt tied into a knot restricted line.

Sever I&I due to large amount of rain dropped in short period of time.

No overflow when crew arrived. Est. Overflow and time.

Due to severe storms and flooding. System was overwhelmed Overflow was controlled and posted.

Severe storms and flooding causing sever I&I

Due to severe storms and flooding. System was overwhelmed

System was still charged from recent storms when winery discharged into system causing overflow.

Roots removed were the size of a lateral. Lateral may have been cleaned recently and roots partially blocked siphon.

Roots from Mh barrels restricted flow in Mh channel

Roots in mh resricted flow in channel

Line restricted with grease combined with I&I due to heavy rains caused overflow Crew was on site when manhole began to seep.

An inflated pouch of Capri Sun along with minor grease and general debris Main cause were rags, some roots and grease

There was no overflow when crew arrived. Crew cleaned line anyway and pulled out some roots. Believe roots amy have Shampoo bottle, paper towers and some grease Baby wipe towels

Sever storm causing flooding & I&I

Severe storm causing flooding & I&I

2 foot section of main sewer was eroded away, causing a blockage.

Rags found in line.

Material that caused stoppage was not recovered, flow drops into a 21 inch diameter line immediately downstream.

Material (sand & gravel) in line, apparently resulted from a break in main line upstream.

Debris and mud entered main line from property owner's lateral that is being replaced.

Debris in system from contractor working on lateral upstream

latex gloves and plastic material plugged the District main - it appears that a homeowner put their materials used in painti District crews lost cleaning tool in response to earlier call same day on Jordan Avenue. This tool travelled a few blocks do Video inspection following day did not show any significant defects. Storm event of about one inch the previous day likely Rag and a root hung up on a faulty drop in downstream manhole.

| Nathenson Creek up 5ft and moving at 15ft per sec Fryer Ck up 2ft from normal running at 5 ft per sec |
|--|
| Creek up 4ft from normal, flow rate at 5ft per sec |
| |
| Pond area. Unknown if pond spilled into Nathenson creek after spill entered pond. Both creek and pond tested |
| Creek up 2 to 4 feet of normal traveling 3ft a sec |
| |
| Seasonal Channel was dry and contained spill |
| |
| |
| |
| Est. Creek was 5 to 6 ft above normal running at 10 fps |
| None |
| No apparent effects. |

| Cleanout |
|--|
| Spill occurred in a densely forested area and was not immediately evident |
| SSO came out of manhole & entered storm drain close by. No chance to capture and return to system. |
| Cleanout inside a business. |
| Event was at 8379 Terrace. There was a related overflow into a home located at 8183 Terrace and another overflow at 82 |

Yard

About 5 gallons flowed to back yard.

Sewage that spilled ended up on the ground and did not reach waterways. This area has very dense vegetation. property owner's yard

Overflow contained in a planter box.

A small amount of sewage on top of and adjacent to manhole.

Overflowed sewage entered into the garage area at 229 Ramona and the bathrom at 241 Ramona Avenue.

about 1 gallon spilled into a business.

Contained about 1/2 of overflow and returned to system Overflow on sidewalk and paved area by street

Rocks and gravel from an upstream lateral caused blockage in District line. District line was replaced about 5 years ago, a Rags at mouth of the manhole blocked part of the flow.

Combination of roots and debris appeared to cause blockage and overflow

Minor obstruction of roots coupled with excessive flow caused overflow. Overflow occurred during storm event that exceeded design storm; 1.86 inches of rain in about 6 hours, 2.4 inches in 12 l Debris that was cleared from line contributed to the cause of the SSO - there would have likely been SSO, but for about 5 Flow exceeded design capacity. Overflow occurred during storm event that exceeded design storm; 1.86 inches of rain Appears to be a sag in the line, debris built up in sag causing blockage.

The cause was determined to be roots that had grown into the main line from an old abandoned lateral that was not proper Caused by Grease and Debris

Homeowner had flushed a significant amount of kitty litter and cat waste down sewer and material blocked the District ma Roots from Lateral pushed into line by plumber

City tree is directly over Stege line Rags, hand towels in line

Rags and some grease blocked flow, causing an SSO.

The problem was caused by roots that were pushed into the Stege main from a lateral upstream. Stege crews retrieved ro

Four inch diameter root plug, obviously from a cleared lateral, was retrieved and determined to be the cause of the blocka

Roots from a lateral, a 4 nich diameter root plug was found in and blocking a manhole

Large tree fell over and its roots sheared the sewer line. Field crews and Supervisor estimate that overflow occurred for b

Roots from a lateral lodged in the District main line.

Roots at an offset in the line

Roots appeared after blockage cleared - must be from an upstream line, this segment is newer HDPE pipe that is in exce

Rags and Papers caused blockage at entrance to manhole

The Stege main line was flowing fully, due to an overflowed creek in an area upstream of the SSO. The creek was flowing Found large amount of baby wipes at location of root intrusion, causing stoppage in main line.

Rags and plastics hung up on roots intruding into the main line, causing the stoppage.

Crews discovered, the day after the SSO, that roots from the lateral at 938 Avis Drive had grown into the District main ar It's hard to tell or not if the baby wipes that were removed caused the overflow, or if there really was an overflow. We did EBMUD was repairing their water line in the area. It was discovered that they had hit the Stege sewer line during the repa Combination of grease and roots caused overflow.

Large amount of grease at manhole entrance from lateral.

Root plug from lateral caused blockage and overflow. Homeowner had a private plumber clear their line earlier in the eve City contractor drilled through Stege main line, broke main line and caused blockage of main.

Rags, hung up on roots in main line.

An EBMUD water line failed the previous week but was not repaired, and it subsequently washed out sections of the Steg Roots that are likely from an upstream source, perhaps a lateral.

Determined that a break in the main line occurred.

Rags and grease hung up on roots.

House connected to abandoned sewer main line. Blockage due to rags (disposable wipes) in main line. Sewer has been a Blockage caused by roots from a lateral. Mainline was replaced in 1999 and is HDPE.

Stoppage caused by asphalt from City paving project and rags (wipes)

Returned about 240 gallons, or 60%, of overflow volume to system at downstream manhole. Had contracted restoration firm clean home.

Overflow occurred during storm event that exceeded design storm; 1.86 inches of rain in about 6 hours, 2.4 inches in 12 l Cleared and inspected downstream main line - all clear.afterwards.

Significant storm flows in street and storm drainage system prevented capture of SSO and return to system.

Unable to contain SO and return to system due to significant storm flows in street and storm drain system.

Unable to contain SSO and return to system due to significant amount of storm flow in street and storm drainage system. Videoed line to determine cause of blockage and SSO.

Contracted restoration firm cleaned the site, garage area and drive, and removed some damaged personal belongings.

Spoke to homeowner about disposing properly of kitty litter. Owner has dozens of cats in their home.

Followed up with a letter to all property owners upstream of blockage, informing them that they should not flush hand tow Had restoration company clean building.

Cleaned up home. Videoed line afterwards, no obvious source of roots.

Changed maintenance frequency to 6 months

Repaired line by contractor immediately after discovery of problem, June 2nd. The entire line iwas replaced the week foll Also changed maintenance frequency from 12 to 6 months.

Used restoration and cleaning service to clean area in home affected by overflow. Line placed on a more frequent cleanir

Videoed line after incident, on 12/10/2009. Replaced line segment with HDPE pipe on 12/14/2009, since video indicated I Oversaw work by a remediation contractor to clean the home at 241 Ramona. Ran lines dwonstream to ensure there was About one week after the stoppage and immediate response, the main line was repaired at the location of the stoppage si Cleaned up residence (restoration company) after clearing stoppage. Videoed line following day and determined that line

Videoed line on June 8, 2010, saw no problems or issues with the line.

The Stege main was repaired by EBMUD crews on 8/16/10.

Also changed cleaning frequency to every 3 months. No evidence of systemic problem in video review of line. Informed FOG inspectors from EBMUD, notified local resident about FOG program and disposal.

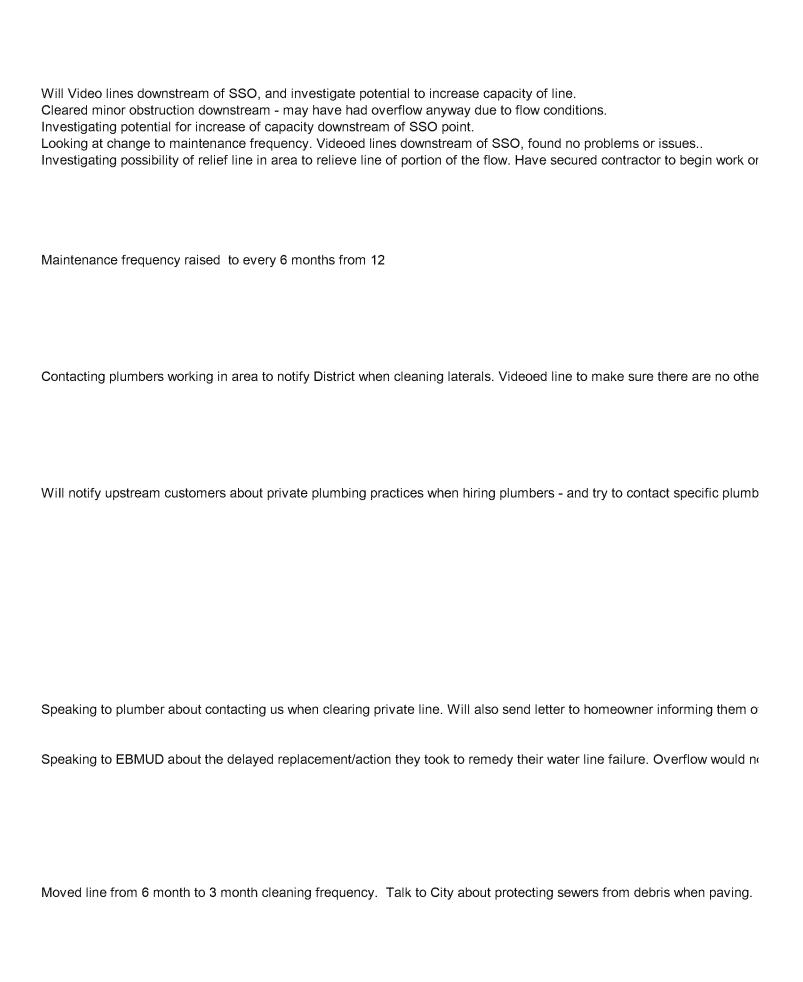

Cleaned up area, had business shut off bathroom connected to this line. Determined cause of overflow and replaced 57 for Videoed line on 11/16/10. Changed cleaning frequency to 6 months from 12 months. Will also treat next year with root for Stege staff bypass pumped flow to a downstream manhole for almost 48 hours while the EBMUD water line was repaired Videoed line afterwards on 2/28/11 and saw no obvious pipe defects. Concluded that roots came from an upstream sourc Videoed line on 3/14/11 and found a break in the main line. Repaired line later that week. Restoration company cleaned r Videoed line on 3/16/11 and found root intrusion. Put line on a schedule for 3 month frequency of maintenance.

Video showed Asphalt in line from City paving project Repaired break on 9/20/2011

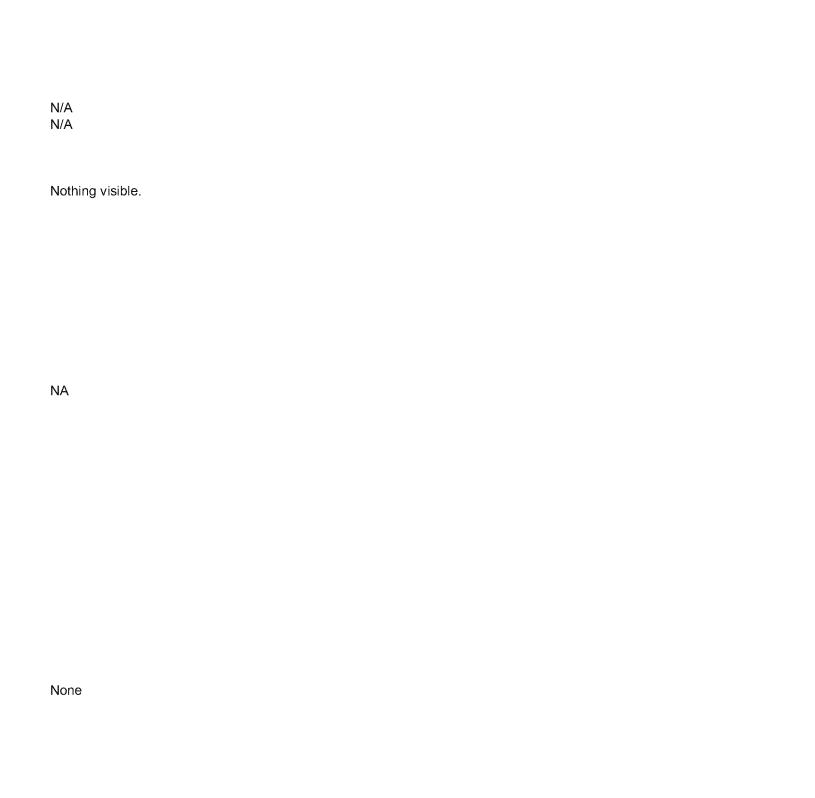

Scrape up dirt in affected area and lay enviro-safe disinfectant. Notified homeowner to not flush baby wipes.
